OF

CONFERENCE OF STATISTS,

HELD AT THE

PARLIAMENTARY BUILDINGS, HOBART,

MARCH 3RD TO 18TH, 1890:

ALSO

A SUGGESTED MODE FOR SYSTEMATICALLY TABULATING
OCCUPATION SUB-GROUPS, BY THE GOVERNMENT STATIS-
TICIAN OF TASMANIA.

TRANSMITTED TO THE HONORABLE P. O. FYSH, CHIEF SECRETARY AND PREMIER,

BY

R. M. JOHNSTON,

REGISTRAR-GENERAL.

Hobart, 19th March, 1890.

General Register Office, Hobart, 19th March, 1890.

SIR,

On behalf of the Members of the Statistical Conference—convened by you by Circular Telegram on 23rd January, for the purpose of deciding upon uniformity of system for taking the approaching Census—I have to state that the Conference met on the 3rd March, in Hobart, and concluded its labours on 18th March, and I have now the honor of transmitting to you their extended Report. (Appended.)

In doing this, by consent of the other Members of the Conference, I also take the opportunity of making known to you more particularly some of the reasons which guided us in our deliberations; and for greater clearness I shall make my observations under distinct headings, as follows:—

Extent and Nature of Subjects of Enquiry.

The Members of the Conference unanimously deemed it unwise to extend the subjects of enquiry beyond the limits already determined in the Householder's Schedule of the Census for 1881, viz.—Name, Sex, Birth-place, Age, Religion (statement not compulsory), Occupation (stating whether Employer, employed on his or her own account, or Wage-earner), Conjugal Condition, Education, Sickness and Infirmary, Materials of Houses, Number of Rooms. The only other item of enquiry agreed to—viz., Number of each description of Live Stock—although not hitherto a subject of Census enquiry in Tasmania, is a most desirable one, and has hitherto formed one of the regular subjects of Census enquiry in the neighbouring Colonies. The model Schedule agreed upon secures perfect uniformity in all these subjects of enquiry, although it was conceded that any Colony is free to extend enquiry beyond these limits should it be deemed advisable to do so.

Classification and Modes of Tabulation.

As there were several imperfections arising out of defective classification and through lack of agreement in modes of Tabulation in the last Census, the Members of Conference were anxious to devise means for avoiding such difficulties or defects in the coming Census. At the same time they were impressed with the importance of adhering as far as possible to modes of classification hitherto employed, as without such cautious consideration useful comparisons with former periods and with other countries would be rendered impossible.

Classification of Occupations.

The classification of Occupations in the last two Censuses of the British Possessions, although of considerable value, has many serious defects. It was originally devised by the late Dr. Farr, C.B., F.R.S., of England, for use in the United Kingdom. The deviser of this classification endeavoured to frame the groups and combinations as far as possible according to the materials on which people worked. So far as minor groups or combinations are concerned this method was fairly successful, but as regards the principal classes of workers it could not form a guiding principle: for it is obvious that all classes of workers must often be related to the self-same materials, and separation into principal Classes could not possibly be based successfully upon this method. It is not surprising, therefore, that Dr. Farr's classification should present many defects and anomalies. For example, Class II.—Domestic, and Class VI.—Indefinite and Non-Productive, hopelessly mixed up Breadwinners and Dependants. Similarly, Primary Producers, Distributors, and Manufacturers were indifferently mixed together under three very distinct Classes—viz., Commercial, Class III; Agricultural and Pastoral, Class IV.; and Industrial, Class V. It is apparent that the lack of any clearly recognised principle for determining the limits of the great Classes themselves led the original Classifier into great perplexities; for we find *Fishermen, Veterinary Surgeon, and Farrier* grouped under Class *Agricultural and Pastoral*; *Chimney-sweep* grouped under workers in *Coal*; and the *Miner, Quarryman*, and other *Primary Producers* are found classed together with a moiety of the *Dealers*, along with *Night-soilmen, Artizans, and Manufacturers*.

Having long been impressed with these defects in the old system, I endeavoured to amend the classification of Breadwinner Group and Dependants in my last issue of the "Tasmanian Official Record" for 1890, and I had the honour of devising what I deemed to be an improved method of classification, which I submitted to the Members of the Conference at its fourth sitting. Mr. T. A. Coghlan, the accomplished Government Statistician of New South Wales, also submitted a detailed scheme of subordinate groups of Occupations somewhat upon the same lines. These together met with the approval of the other Members of the Conference, and I had the honour to be associated with Mr. Coghlan in drawing up an elaborate and systematic scheme of Classification of Occupations, embodying the principles already presented to them, which, with slight amendments, eventually received the unanimous approval of the Members of the Conference, who resolved to adopt it in the tabulation of the next Census.

The amended Classification is divided into seven principal classes. The first six embrace all independent *Breadwinners*; the seventh, or last class, embracing all *Dependants*. The three important classes related to *Materials* are kept separate by regard to the relationship which their *differing services* bear to the materials which pass through their hands. Thus, Primary Producers of Raw Materials directly acquired by labour from natural sources, bring naturally into one class (Class V.) those engaged in Agriculture, Grazing, Fishing, Hunting, and Mining. Transporters, Dealers or Distributors, who effect no material change in Producers' materials, come naturally together in Class Commercial (Class III.); while all skilled and unskilled modifiers or constructors of materials, in a similar way, come naturally together in Class Industrial (Class V.)

The Domestic Class (Class II.) no longer includes wives and others engaged at home in domestic duties for which no remuneration is paid, nor dependent relatives or children.

The Professional Class (Class I.) only includes those ministering to Religion, Charity, Education, Art, Science, and Amusement, and those connected with the General and Local Government, and in Defence, Law, and Protection. All persons employed by the General and Local Government whose occupations are properly related to the Producing, Commercial, and Industrial Groups are classed with the latter, as it is obvious the main value of such classification is to ascertain *how employed*, and not *by whom employed*. The exact extent of the Government Service can be easily obtained by reference to the Civil List, and by direct reference to Local Bodies throughout the country.

To facilitate classification, I was also enjoined by the Conference to draw up a more extended tabulation of sub-groups under each of the 104 sub-orders. This I have now done, and, when printed, it is intended to submit the same for the final consideration of the several members of the Conference. It is hoped that this amended classification will more fully meet the wants of the social economist and statesman, who were often, hitherto, misled by the defective nature of the groupings in the older mode of classification. The new classification has also the advantage that tables may readily be prepared from it on the lines of the old method to enable comparisons to be made.

General.

The other matters, though of great importance to the tabulator and statistician, only affect matters of detail, and secure accuracy and uniformity. It is important to state, however, that one of the recommendations affecting the Census Act, to be introduced during the first Session of Parliament, is, that only the heads of enquiry—not the Schedule—be embodied in the Census Act.

I may, in conclusion, take the liberty of reminding you that the work to be done prior to the actual date fixed for the Census involves an enormous amount of labour, for which provision must be specially made at an early date. A draftsman should be set apart as soon as possible to work under the direction of the Superintendent of the Census, in preparing by hand the colours of the boundaries of districts to be enumerated on charts and plans; and, as soon as the Act is passed, it will be necessary to provide for the extraordinary amount of printing necessary in the matter of schedules, enumerators, books, printed instructions, compilation-sheets and cards, &c.

I trust the observations which I have made may be of some service to you when dealing with the recommendations contained in the accompanying Report of the Conference.

I have the honor to be,

Sir,

Your obedient Servant,

ROBT. M. JOHNSTON, *Registrar-General.*

The Hon. P. O. Fysh, M.L.C., Premier and Chief Secretary.

REPORT.

TO THE HONORABLE THE CHIEF SECRETARY OF TASMANIA.

SIR,

WE, the Representatives of various Australasian Colonies, at a Conference held at Hobart, in accordance with your invitation, for the purpose of arranging for the collection and compilation of the ensuing Census upon a uniform principle, have the honor to report as follows:—

1. We have held twelve meetings, the Minutes of which will be found in Appendix A.
2. The enquiries to be embodied in the Census Schedule have been fully discussed, and we have agreed to certain recommendations on the basis of which we have framed a model Schedule, a copy of which is given in Appendix B.
3. In view, however, of the possibility of its being found desirable to make alterations in the wording of this Schedule after the Census Act has been passed, in cases where the passing of a Census Act is necessary, we have unanimously resolved to recommend that only the heads of enquiry—not the Schedule—be embodied in the Census Act.
4. The compilation of the Returns of the Census upon a uniform principle has engaged our earnest attention; and, after much deliberation, we have agreed to a series of Resolutions bearing upon the subject, the substance of which is given in Appendix C.
5. The Forms decided upon, with the exception of those for the Occupation Tables, have been mainly those followed by most of the Colonies in compiling the Returns of the Census of 1881. We have, however, deemed it desirable to make radical changes in the tables showing the occupations of the people, as those hitherto adopted have been judged to be out of date, and not suitable to the present requirements of the several Colonies. After lengthened consideration and discussion, we have devised a system of classification which, we believe, with possibly some modifications to be indicated by future experience, will be found to offer a means of overcoming the great difficulties with which the systematic grouping of the occupations of the people of a country has always been found to be attended. The details of this proposed classification will be found in Appendix D.
6. To facilitate, however, comparisons with the Returns of previous Censuses, we propose that, in addition to the Tables of Occupations compiled according to the newly devised system, subsidiary tables be given showing the different groups of occupations, prepared upon the lines of the plan which the new system is intended to supersede.
7. In settling the form of classification under the different heads of enquiry, we have had in view Lord Knutsford's circular despatch of the 28th February, 1889; and have arranged to give effect, as far as possible, to the recommendations embodied in the letter of the Registrar-General of England attached thereto.
8. The system proposed for adoption is calculated to secure uniformity in the tabular statements to be published by the different Colonies. This uniformity, however, will not be broken should it be desired to amplify the Returns, or bring them out in more extended detail than that provided for, which it is distinctly understood any Colony is at liberty to do.
9. We have much pleasure in expressing our sense of the valuable assistance rendered by Mr. T. C. Just in his capacity of Secretary to the Conference, to which post, by the kind consideration of your Government, he was appointed before our proceedings commenced.

We have the honor to be,

Sir,

Your obedient Servants,

H. H. HAYTER, *President.*

H. J. ANDREWS.

Mr. Johnston submitted the following classification as to Occupations which he had drawn up, in conjunction with Mr. Coghlan:—

CLASS I. *Professional*—(*Andrici*, Farr.)—Embracing all persons mainly engaged in the government and defence of the country, and in satisfying the intellectual, moral, and social wants not included in the material services rendered by other classes hereafter specified or classed.

CLASS II., *Domestic*.—Embracing all persons engaged in rendering personal services, and in the supply of board and lodging, for which remuneration is usually paid.

CLASS III., *Commercial*—(Trade and Transport, United States Census, 1881—*Agorici*, Farr.)—Embracing all classes of service directly connected with the sale, transfer, distribution, storage, and security of property and materials, but who as a rule do not effect any material change in the nature of the objects which pass through their hands.

CLASS IV., *Agricultural and Primary Producers*—(*Georgici*, and part of the *Technici* of Farr.)—Embracing all classes of service mainly engaged in the cultivation or acquisition of food products and in obtaining other raw materials from natural sources.

CLASS V., *Industrial*—(Part of the *Technici* of Farr.)—Embracing all persons not otherwise classed who are principally engaged in specialties connected with the construction, modification, or alteration of raw or unspecialised materials so as to render them available for the various uses of man, but excluding as far as possible all who are engaged mainly or solely in the service of protection and distribution.

CLASS VI., *Indefinite*.—Embracing all persons who derive an income from services rendered, but the direction of which services cannot be exactly determined.

CLASS VII., *Dependants*.—Embracing all persons dependent upon relatives or natural guardians, including wives and children, relatives not otherwise engaged in pursuits for which remuneration is paid, and all persons supported by private or public charity, or maintained at the expense of the public revenue.

The classification was discussed and referred to Messrs. Johnston and Coghlan to prepare Sub-orders with alphabetical classification of Occupations thereunder.

Mr. Coghlan called attention to the classification of women, especially in reference to agricultural pursuits. It was resolved—"That it be understood and agreed upon, that wives be not tabulated as of the occupation of their husbands unless specially so stated on the schedule. Where no occupation is stated such women to be classed under the head of domestic duties."

NUMBER OF LIVE STOCK KEPT.

[Schedule of Live Stock to follow.]

GENERAL INSTRUCTIONS.

This Schedule is to be filled up in accordance with the headings to the columns on the other side by THE OCCUPIER OR PERSON IN CHARGE OF THE DWELLING with particulars respecting all the persons who slept or abode therein on the night of the _____, also of the Live Stock kept. If the house is occupied by different families in separate stories or apartments, each such story or apartment must be treated as a separate Dwelling, and the Occupier or person in charge of each must make a Return upon a separate Schedule. In the case of Pastoral Establishments the Proprietor or Superintendent may fill in the Returns of his complete establishment, but a separate Schedule must in such case be filled for each of the out-stations or huts in which a distinct family or person resides, in addition to that for the Home Station; and if any out-station is in a different Sub-enumerator's district from that of the Home Station, the Schedule for it is to be delivered to the Sub-enumerator of the sub-district in which such dwelling is situated.

This Paper will be called for by the Sub-enumerator on Monday the _____ day of _____ or as soon after as practicable. Prior to that date the answers should be written in the proper columns and the document duly signed by the occupier or person in charge. It is the Sub-enumerator's duty to verify the facts; and, if the form from any cause should not have been filled up, or should have been insufficiently or erroneously filled up, to record the necessary particulars or make the necessary corrections, from inquiries which he is authorised to make for that purpose.

Instructions for filling up the Column headed "Profession, or Occupation."

ARMY AND NAVY.—If on actual service, state so. If retired, state present occupation. PERSONS IN THE SERVICE OF THE GENERAL OR LOCAL GOVERNMENT to state the position they hold, and, if engaged in any other occupation, to specify its nature.

JUSTICES OF THE PEACE, ALDERMEN, TOWN COUNCILLORS, &c., and other important public officers to state their ordinary profession or occupation.

MINISTERS OF RELIGION to state Denomination. They are requested not to employ the indefinite term "Clerk." Local or occasional preachers to return their ordinary occupations.

MEMBERS OF THE LEGAL PROFESSION to state whether in actual practice; if not practising, to state present occupation. Persons employed in Solicitors' Offices to distinguish whether they are articled or other clerks.

MEMBERS OF THE MEDICAL PROFESSION to state whether they are Physicians, Surgeons, or General Practitioners, and return themselves as *practising* or *not practising*; if not practising to state present occupation.

TEACHERS, AUTHORS, PUBLIC WRITERS, and ARTISTS to state the particular branch of science, literature, or art in which they are engaged. Engineers to state whether civil, mechanical, or mining, &c. Surveyors to state whether land, mining, or marine, &c.

PERSONS ENGAGED IN TRADE OR COMMERCE, as Merchants, Manufacturers, Storekeepers, Retailers, Brokers, Agents, Auctioneers, &c., to state the particular business in which they are engaged, or the principal commodity in which they deal.

CLERKS, BOOKKEEPERS, SALESMEN, SALESWOMEN, SHOPMEN, COMMERCIAL TRAVELLERS, &c., to be described according to the business with which they are connected—"Bank Clerk," "Railway Clerk," "Salesman in Soft Goods Store," "Shopman to Grocer," Traveller to Wine Merchant," &c.

The term FARMER or GARDENER to be applied to all persons actually in occupation of land and tilling, whether proprietors or tenants. The word "landowner" is

too vague. Wives, sons and daughters, brothers, or other relatives habitually helping on farms and stations, may be returned as "Wife assisting," "Son assisting," "Daughter assisting," &c., as the case may be.

MINERS to specify the nature of the mineral on which they work, and in respect of metallic ores to add whether *lode* or *alluvial*. A Miner working for another should return himself as "Miner," not as a labourer.

ARTISANS and MECHANICS should always mention the particular branch of their trade; thus—"Ship Carpenter," "House Carpenter," "Shingler," "Coachsmith," "Locksmith," "Horse-shoer."

CARTERS, CARRIERS, LABORERS, SERVANTS, &c. to be described in connection with their usual employment, "Carter in Town," "Bullock Driver on Station," "Laborer making Roads," "Omnibus Driver," "Cabman," "Railway Porter," "Telegraph Messenger," "Domestic Servant."

Persons not following any Profession, Trade, or Calling, and not holding any public office, but possessed of independent means, may designate themselves "Proprietor of Land," "Proprietor of Houses," "Capitalist," "Annuitant," as the case may be. The word "Householder" should not be used in place of "proprietor of houses," nor the word "gentleman" or "lady" in place of "no occupation."

WOMEN.—The occupations of Women who are employed in any but domestic duties should be distinctly recorded; but they should not be entered as engaged in the occupations of their Husbands or Fathers, &c., unless they habitually assist them. When only in the capacity of Wife, Mother, Daughter, Sister, &c., write "Domestic Duties."

PERSONS IN HOSPITALS, ASYLUMS, GAOLS, ETC.—The position of these in the institution being given in the second column in accordance with the instructions at its head, their calling (if any) before they entered the Institution is to be inserted in the Occupation column.

* * Every answer should be written in full. The use of dots (,) or ditto (do.) leads to numerous mistakes, and is not to be accepted by the Sub-enumerators.

Example of the mode of filling up the Return.

[Model Schedule to be inserted here.]

APPENDIX C.

RESOLUTIONS OF THE CONFERENCE.

5. That, with reference to Education, an enquiry be made as to those able to read and write, able to read only and not write, and unable to read; also as to those who may be graduates of any University, together with the designations of their respective degrees, and of the Universities at which they were severally conferred.

COMPILATION.

9. That the Chinese and the Aborigines, as far as possible (including half-castes), be tabulated apart from the general population under every head of enquiry, so that it may be possible to combine their numbers therewith or separate them therefrom, as may be desired.
10. That in compiling the Census Returns, the groupings be as definite as possible; and although it may be sometimes necessary to have such headings as "Other Birthplaces," "Other Religions," "Miscellaneous Occupations," &c., the names of the various Birthplaces, Religions, Occupations, &c. placed under such heads be in every case stated, in foot-notes or otherwise.

That children respecting whom the return of religion is unspecified be tabulated as of the religion of their parents if the father and mother are stated to be of the same religion, or of the religion of one parent if specified; but that if the parents are of different denominations, no assumption be made as to the religion of the children, who are to be classed as unspecified.
14. That the ages of the people of either sex be tabulated in single ages up to 21, then in quinquennial periods of age up to 85, and after that in single ages; also, that a table be prepared showing the numbers of either sex in the whole population at each year of age.
15. That in tabulating the Occupations of the people, the numbers of either sex under 5 years of age between 3 and 15; 15 and 20; 20 and 25; 25 and 45; 45 and 65, and over 65 be distinguished; that the occupations be tabulated according to the amended system of classification indicated in Appendix D.; also that additional tables, so far as the classes and orders are concerned, be prepared according to the systems followed in the majority of the Australasian colonies at the Census of 1881; also that subsidiary tables be compiled showing (I.) the ordinary occupations of the unemployed of either sex; (II.) employers

of labour and persons in business for themselves, also wage-earners: (III.) the ordinary occupations of inmates of either sex of (a) hospitals, (b) benevolent asylums, (c) hospitals for the insane, (d) other charitable institutions, (e) gaols and penal establishments; (IV.) the occupations of university graduates. 16. That in the table of Education the people be grouped in single ages from 3 to 21 years of age, and after that in quinquennial periods to 85 years of age; those of either sex able to read and write, able to read only, and unable to read, being distinguished. That no child under 3 years of age be set down as able to read, and no child under 5 years of age as able to write; also, that Chinese unable to read English be set down as unable to read. That a table be also prepared showing the degree of primary instruction possessed by children between 5 and 15 years of age attached to each religious denomination.

APPENDIX E.

CORRESPONDENCE.

Colonial Secretary's Office, Fiji, Suva, 12th February, 1890.

SIR,

I HAVE the honor to acknowledge the receipt of your telegram dated 23rd ultimo, with reference to a projected Conference of Statisticians to decide upon a uniformity of system for taking the approaching Census.

In reply, I am directed to say that, although no delegate from this Colony could attend the meeting, this Government will be glad to fall in with the arrangements recommended by the Conference, as far as circumstances will allow.

I have the honor to be,

Sir,

Your most obedient Servant,

T. STEWART,
for the Colonial Secretary.

The Hon. the Premier of Tasmania.

P.S.—The mode in which the Vital Statistics of the native population have heretofore been tabulated will be seen on reference to the enclosed Return.

The non-European element forms some fifty-nine sixtieths of the population of this Colony; and the members of this class are for the most part unable to tell their age in years.

The Age Statistics have therefore, in the case of the native population, been divided into the following periods; viz.—

Children under 1 month.

„ „ 1 year.

„ „ 10 years.

Youths.

Adults.

Aged.

It is not at present deemed possible to collect the Age Statistics of the native population in any more exact manner.

H. J. COLFE.

Western Australia.
